AGEDCAREAI · NOW INTEGRATED WITH AUSMED

Governance and secure AI, in one place.

AgedCareAI brings your governance work and your own records together, with AI that supports your people and keeps them in control. Built for providers working under the strengthened Aged Care Quality Standards.

WHAT IS INSIDE

- AgedCareAI Governance
- AgedCareAI Intelligence
- Ausmed learning integration

AgedCareAI × Ausmed

NEW PARTNERSHIP

Turn what happens on the floor into the right learning for your team.

AgedCareAI

AGEDCAREAI × AUSMED

Turn what happens on the floor into the right learning for your team.

AgedCareAI now works with Ausmed. It finds recurring themes in incidents, progress notes and complaints, then points to the Ausmed learning that matters for the right staff groups. Your managers review and approve every recommendation, so training follows the evidence and people stay in control.

Managers decide
Approve every recommendation

Learning that follows the evidence

Training is guided by what your records show, not by guesswork or a fixed calendar.

Managers stay in control

AgedCareAI recommends. Your managers review and approve every recommendation.

Care evidence and learning together

Ausmed learning data is brought into AgedCareAI, so the two sit side by side.

THE AGEDCAREAI PLATFORM

Governance

Policies, your CIP plan, forms, meetings, board packs, risks and complaints, managed in one place. One version, ready for the board and for audit.

Intelligence

A secure AI layer over the systems you already have, inside your own tenant and behind your own firewall, with a human in the loop.

See it working with your data
