AgedCareAI

Innovation Philosophy

# Intelligence for your people.

A secure AI assistant set up around your organisation and connected to your own data, so responses draw on your information. Not a generic public AI.

### Chat
A safe place to ask anything. A private assistant that knows your organisation.

### AskMe
Staff ask in plain words and get a clear answer from your own policies.

### Canvas
Letters and reports, written together. Edit the draft or change the tone.

### Insights
One click and a clear report of the issues and trends in your records.

### Autopilot
Daily jobs run for you, with the results ready for your team to review.

### Whisper
Speak instead of type. Your words are written down, ready to review.

### Personalised responses
Tone, detail and language fit the person asking.

### 360 View
Your organisation on one page, shown differently to care staff, managers and executives. Coming soon.

## One overview, different for every role

### Care staff
Handovers and shift notes. Answers from your policies.

### Managers
Rosters at a glance. Daily reports.

### Quality and compliance
Compliance against the Standards. Audit ready evidence.

### Executives and boards
Risks always in view. Board and committee reports.

## Built to sit inside your organisation

Your own closed environment. Information stays private and is never used to train public AI.

Secure sign in with access based on role.

Works with the systems you already use. Nothing replaced.

People stay in the loop. AI drafts. Your team reviews, decides and approves.

## Talk to the team about a live demo
